```
acquences have been round to be highly momologous to a human lympholog cell activation antigen designed CD39 (Maliszenski et at. (1994). J. Immunol.: 3574-3583). The complete sequences of the AFPDases types I and II have not been obtained yet. Assuming that the CD39 gene product is an AFDBase type II, the use of CD39 in the reduction of platelet aggregation and of thrombogenicity may be contemplated, as well as a process of making AFPDases using the CD39 sequence (AAT38516)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 510 AA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               88888888888
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Aaw04334 Human lym

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          420
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  420
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          480
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               480
                                                                                                                                                                                                  Non-human transgenic or somatic recombinant mammals, whose cells contain a heterologous DNA encoding a polypeptide (especially human CD39 protein) having ATP-diphosphohydrolase activity under cellular activating conditions is claimed. In particular the animal is a pig and its conthuman cortasues or organs) can be used for transplantation. DNA coding for human CD39 is also useful for genetically modifying a mammalian cell to render it less susceptible to an inflammancory or immunological stimulus and platelet aggregation. The modified cells can be used to prevent or alleviate a thrombotic condition. The present sequence is that of the human CD39 protein and was disclosed in J.Immunol. 153 (8) (1994) 3574-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            9

The present sequence is the human soluble CD39 protein, a cell surface molecule, having apyrase activity. It is derived from a human B cell line constructed by referred to as MP-1. Soluble CD39 is constructed by removing the N- and C-terminal transmembrane domains. It retains the capacity to metabolise ATP and ADP at relevant concentrations and the ability to block and reverse ADP-induced platelet activation and cerevity including platelet aggregation. Soluble CD39 polypeptides are useful for inhibiting angiogenesis. It is useful for the treatment of unstable angina, myocardial infartcion, stroke, coronary artery disease or injury, atherosclerosis, peripheral vascular occlusion, preclampsia, embolism, platelet-associated ischaemic disorders including lung, coronary and cerebral ischaemia, thrombotic disorders including coronary, peripheral and creabral artery thrombosis, intracardiac and venous thrombosis, coagulopathy, deep venous thrombosis (DVT), pulmonary embolism (PB) and transient ischaemic attack. Soluble CD39 is also useful for preventing thrombus formation or reformation, occlusion, reocclusion, seconlasion, seconlasion, seconlasion, seconlasion, seconlasion, seconlasion, seconlasion, seconlasion, and secondary and serventing thrombus formation or reformation, occlusion, reocclusion, New soluble CD39 polypeptides having apyrase activity, useful for inhibiting angiogenesis and treating unstable angina, myocardial infarction, stroke, coronary artery disease or injury.

                                                                                                                                                                                                                  ઠે
                                                                                                                                                                                                                                        셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                 The present sequence is soluble CD39 having apyrase activity. Soluble CD39 retains the capacity of wildtype CD39 to metabolise ATP and ADP at physiologically relevant concentrations as well as the ability to block and reverse ADP-induced platelet activation and recruitment including platelet aggregation. This is used in the treatment of unstable angina, myocardial infarction, stroke, coronary artery disease or injury, catherosclerosis, peripheral vascular occlusion, preeclampsia, embolism, platelet-associated ischaemia disorder including lung ischaemia, coronary ischaemia and cerebral ischaemia, thrombotic disorder including coronary ischaemia and cerebral artery thrombosis, intracardiac thrombosis, peripheral artery thrombosis, uncous thrombosis, intracardiac thrombosis, cerebral artery thrombosis, uncous thrombosis, trombosis, coagulopathy, deep venous thrombosis, lunguary embolism (PB), cagulopathy, deep venous thrombosis (DVT), pulmonary embolism (PB), transient ischaemic artack. Soluble CD39 is also useful for preventing thrombosis of blood vessels or stroke
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          240

The present sequence is the human CD39 polypeptide. The present sequence or its active fragment may be administered to treat or prevent stroke in a subject susceptible to intracranial haemorrhaging or an ischaemic disorder. The CD39 polypeptide inhibits ADP-mediated platelet aggregation or leukcoyte accumulation and/or ATP by increasing ADP catabolism to the subject. It is useful for treating or preventing stroke, thrombotic disorders and ischaemic disorders such as peripheral vascular disorder, pulmonary embolus, venous thrombosis, myocardial infarction, transient ischaemic attack, unstable angina, reversible ischaemic neurological deficit and sickle cell anaemia. It is also useful for treating or preventing a stroke disorder in a subject undergoing heart surgery, lung surgery, spinal surgery, brain surgery, vascular surgery, abdominal surgery, or organ transplantation surgery
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Treating stroke in a subject susceptible to intracranial hemorrhaging and an ischemic disorder, involves administering a CD39 polypeptide which inhibits ADP-mediated platelet aggregation or leukocyte accumulation.

The invention relates to a conjugate (I) comprising an enzyme and a biodegradable polymer, where (i) enzymatic activity of the enzyme is higher relative to that of the enzyme in the absence of the biodegradable polymer, or (ii) the half life of the enzyme is longer than that of the enzyme in the absence of the polymer. The enzymatic activity (i) is at enzyme in the absence of the polymer. The enzymatic activity (i) is at polymer. The enzyme higher in the presence of the polymer. The enzyme is a multimeric, soluble and/or extracellular enzyme, preferably an apyrase, especially a soluble form of CD39 and catalyzes hydrolysis of nucleoside diphosphate. The conjugate can be used to treat diseases relating to abnormal levels of extracellular nucleotides or abnormal aggregation of platelets, particularly cardiovascular disease, cancer, espeis or a disease related to graft transplant.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   SLYIYKWPAEKENDTGVVHQVEECRVKGPGISKFVQKVNEIGIYLTDCMERAREVIPRSQ 120

The present invention relates to a method of treating cardiovascular disease in a subject, comprising administering an IL-17, IL-18, 4-1BB, CD30 or OX40 antagonist. The IL-17, IL-18, 4-1BB, CD30 or OX40 antagonists are useful for treating cardiovascular disorders, e.g. (chronic immune) myocarditis, congestive heart failure, aneurysms, angina, embolism, restenosis, ischaemia or thrombocytopenic purpura. The present sequence is a polypeptide used in the exemplification of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           9

                                         nucleotide triphosphatase; NTPase) and nucleic acid molecules encoding such polypeptides. CD39-like polynucleotides may be used as hybridisation probes. PCR primers and in chromosome and gene mapping. Polypeptides of supplements, in generating an antibody that specifically binds the polypeptide, as anti-thrombotic or anti-tissue graft rejection agents, or for regulating ATP neurotransmission in smooth muscle, peripheral ganglia or brain. Sequences of the invention are useful in modulating ecto-ATPase activity and for identifying compounds that modulate ecto-ATPase activity. The present sequence is human CD39 protein, a member of the activity. The present sequence is find sequence is the same as that shown as SEQ ID NO:13 in the sequence listing of the specification. However this sequence has additional residues at its ends.
                                                                                                                                                                                                                                                        ö

The present invention relates to CD39-like polypeptide and its encoding polynucleotide. The invention is useful for preventing, treating or ameliorating autoimmune deficiency disorders including connective tissue disease, multiple sclerosis, systemic lupus erythematosus, rheumatoid arthritis, autoimmune pulmonary inflammation, Guillain-Barre syndrome, autoimmune thyroiditis, insulin dependent diabetes mellitus, myasthenia gravis, graft-versus-host disease or autoimmune inflammatory eye disease, myeloid or lymphoid call deficiencies, periodontal disease and other tooth repair processes, inflammatory conditions including inflammatory bowel disease and crohn's disease, leukaemias and nervous system city inflammatory conditions including inflammatory conditions and nervous system inhibiting platelet aggregation, food supplement, anti-tissue graft rejection agents, for regulating neurotransmission by ATP in smooth sequence is a human CD39 protein. Note: This sequence is stated to be the same as that shown as SEQ ID 13 in sequence listing, however these
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    New isolated CD39LA polypeptide and polynucleotide, useful for preventing, treating, or ameliorating multiple sclerosis, systemic lupus erythematosus, rheumatoid arthritis, myasthenia gravis, or graft-versus-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             9

conclocition triphosphatase; NIPase) and their encoding polymucleotides.

The invention is useful in treating cancer, leukaemia and related disorders such as acute lymphocytic leukaemia, acute myelocytic leukaemia, acute myelocytic leukaemia, and chronic leukaemia, autoimmune disorders such as multiple sclerosis, chematoid arthritis, Guillain-Barre syndrome, insulin dependent diabetes rheumatoid arthritis, Guillain-Barre syndrome, insulin dependent diabetes wellitus, myasthenia gravis and graft-versus-host disease, allergic disorders such as actima, respiratory disorders; inflammatory disorders conduscribed as actima, respiratory disorders, inflammatory disorders conduscribed such as septic shock, systemic inflammatory response syndrome (SIRS) and crohn's disease, central and peripheral nervous system disorders such as ischaemia, Parkinson's disease, Alahaimer's disease, Huntington's chorca, systemic lupus erythematosus, human immunodeficiency virus-associated myelopathy and transverse myelopathy and utritional disorders such as vicamin B12 deficiency, folic acid deficiency, Wernicke disease, tobaccocalcon amblyopia and Marchialava-Bignami disease. The invention also has haemostatic and thrombolytic acivity. The invention acts as a cytostatic conduction and is useful in immunotherapy. The present sequence is human CD39 protein represented in the specification as being the sequence listing, however the two sequences are different.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  180

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               and for identifying compounds that can be utilised for modulating ectory.

ArPase activity. The invention is useful for preventing, treating or ameliorating andical condition, e.g. multiple sclerosis, rhemmatoid arthritis, autoimmune thyroiditis, diabetes mellitus, myasthenia gravis, autoimmune inflammatory eye disease, osteoporosis, osteoarthritis, alabetement's disease, Parkinson's disease, amyotrophic lateral sclerosis, leukaemia or nervous system disorders and in gene therapy. The present sequence is the human CD39 protein. Note: This sequence is stated to be the same as that shown as SEQ ID 13 in sequence listing, however these
    markers, and as food supplements and for modulating ecto-ATPase activity

The CD3914 polymucleotide is useful as hybridisation probes, as primers for PCR, for chromosome or gene mapping, in the recombinant production of protein, and in generation of antisense DNA or RNA. The protein of the invention is used as molecular weight

The invention relates to a novel pharmaceutical composition active on anglogenesis comprising an endothelial cell nucleic acid whose expression is induced by an anglogenic factor and inhibited by an angiostatic agent or its complement or fragment, a polypeptide sequence encoded by the nucleic acid or its fragment, a molecule capable of inhibiting expression of the nucleic acid or a molecule which binds to the polypeptide
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Compositions for diagnosing, prognosing and treating angiogenic disorders including tumor vascularization and heart disease, comprise nucleic acid or polypeptide differentially expressed in angiogenesis.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   sequence. The invention is used to disgnose, prognose or treat an angiogenic disorder in a mammal, particularly a human. The disorder is particularly tumor vascularization, a retinopathy, rheumatoid arthritis, crohn's disease, atherosclerosis, ovary hyperstimulation, psoriasis, endometriosis associated with neovascularization, restenosis due to angioplasty, overproduction of tissue due to cicatrisation, a peripheral vascular disease, hypertension, vascular inflammation, Raynaud disease, aneurism, arterial restenosis, thrombophlebitis, ischemia, angina, myocardial infarction, chronic heart disease, cardiac congestion or corresponds to a protein encoded by a differentially expressed DNA used in the composition of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               61

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention relates to a novel pharmaceutical composition active on angiogenesis comprising an endothelial cell nucleic acid whose expression is induced by an angiogenic factor and inhibited by an angiostatic agent or its complement or fragment, a polypeptide sequence encoded by the nucleic acid or its fragment, a molecule capable of inhibiting expression of the nucleic acid or a molecule which binds to the polypeptide sequence. The invention is used to disquose, prognose or treat an angiogenic disorder in a mammal, particularly a human. The disorder is particularly tumor vascularization, a retinopathy, rheumatoid arthritis,

hypothetical protein C33H5.14 - Caenorhabditis elegans
C;Species: Caenorhabditis elegans
C;Species: Caenorhabditis elegans
C;Species: Caenorhabditis elegans
C;Accession: T34147
R;Bradshaw, H.; Stellyes, L.
submitted to the RMBL Data Library, November 1995
A;Description: The sequence of C. elegans cosmid C33H5.
A;Reference number: Z21482
A;Reference number: Z21482
A;Reference number: Z21482
A;Accession: T34147
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Besidues: 1-485 - GRA>
A;Accession: T34147
A;Gresinental source: strain Bristol N2

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        nucleotics to regulate purinergic neurotransmission. Could also be implicated in the prevention of platelet aggregation. Could also Hydrolyzes ATP and ADP equally well.

CATALYTIC ACTIVITY: ATP + 2 H(2)O = AMP + 2 phosphate.

COFACTOR: Requires calcium and magnesium.

SUBUNIT: Homodimer; disulfide-linked (By similarity).

-I-FUNCTION: In the nervous system, could hydrolyze ATP and other nucleotides to regulate purinergic neurotransmission. Could also be implicated in the prevention of platelet aggregation. Hydrolyzes ATP and ADP equally well.

-I-CATALYTIC ACTIVITY: ATP + 2 H(2)0 = AWP + 2 phosphate.

-I-CATALYTIC ACTIVITY: ATP + 2 H(2)0 = AWP + 2 phosphate.

-I-SUBUNIT: Homodimer; disulfide-linked (By similarity).

-I-SUBCLIULAR LOCATION: Integral membrane protein (Potential).

-I-TSSUE SPECIFICITY: Expressed in primary neurons and astrocytes, kidney, liver, muscle, thymus, lung and spleen.

-I-FTM: N-G-Lycosylated.

-I-SIMILARITY: Belongs to the GDA1 / CD39 NTPase family.
